

Hansfive®

# H100

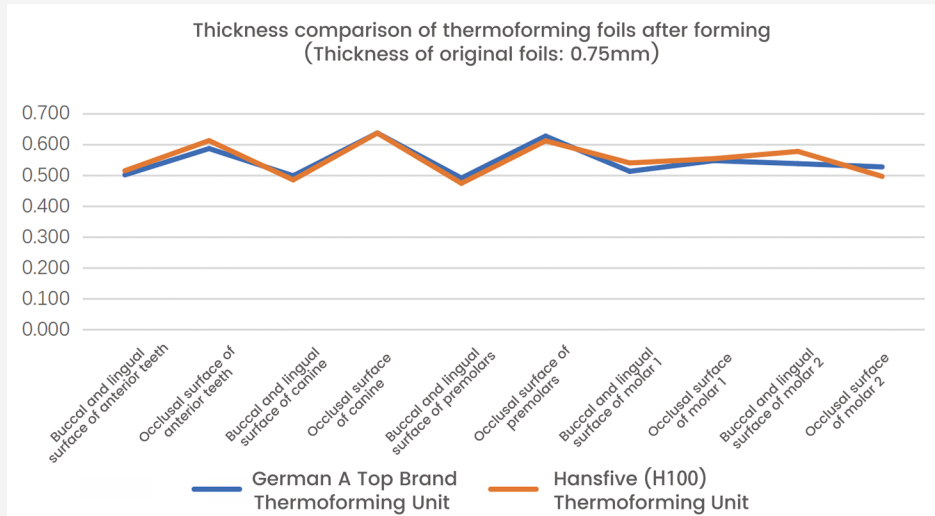

## Thermoforming Unit

One-click forming

## High precision

The H100 adopts positive pressure forming technology and Hansfive's leading technology of automatic detection of deformation, which enables the thermoforming foils to have higher forming accuracy, more uniform thickness distribution, higher elastic modulus and better expressivity.

## One-click operation

With a 7-inch large touch screen and simple operation interface design, the H100 can realize one-click intelligent operation, which improves your work efficiency.

invisible aligners

retainers

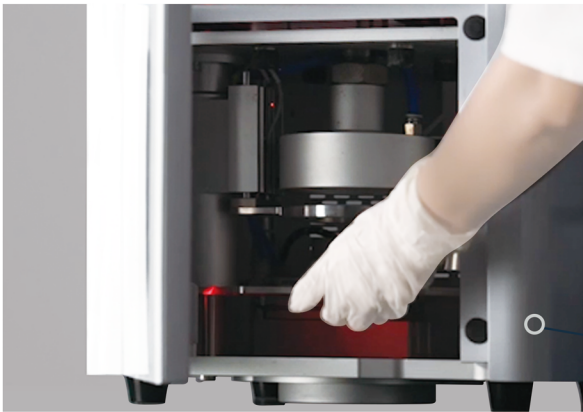

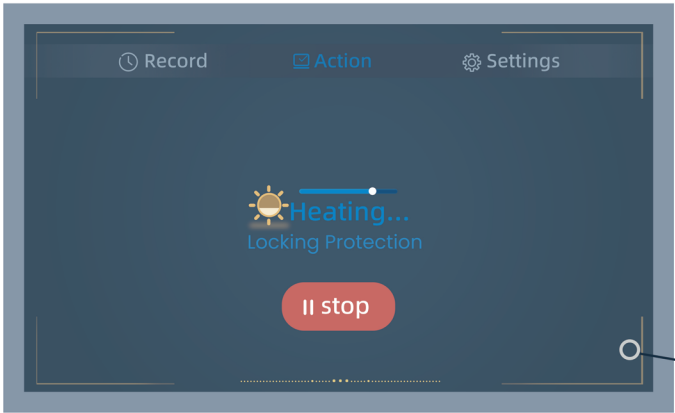

sports mouthguards

## Wide range of applications

The H100 supports the production of various dental appliances such as invisible aligners, retainers, and sports mouthguards, fully meeting the diverse workflow needs of doctors and technicians.

# Intelligent alerts

With the locking protection and door unclosed warning design, the H100 can intelligently remind the unit status for safer operation.

## Technical Specifications

Model Name	H100
Dimensions	375mm×345mm×561mm
Power	800 watt
Working Pressure	4.0-4.5 bar
Support Foil Size	Round : diameter of 125mm,diameter of 120mm Square : 127mm×127mm 0.4-1.5mm
Working time	1.5min
